

A sample is a terrible thing to waste.

How are you moving your freezers?

Maintaining sample integrity during relocation requires the proper equipment and technical expertise. Our expert staff manages the complex logistics of storing and transporting your biomaterials, from cell lines to active pharmaceutical ingredients (API) under full regulatory compliance.

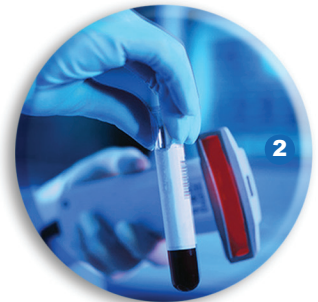

Kryosphere's complete solution:

Move freezers across town or around the world.

- 1 Transport fully loaded freezers in KryoTRUCK™, our mobile biorepository.
- 2 Secure point-to-point cold-chain-of-custody with full audit trail.
- 3 Handle liquid nitrogen specimens in our specially designed KryoCART™
- 4 Store samples off-site in our GLP/GMP facility while you get settled.
